# SHAPING THE FUTURE OF FISH FARMING

## Almost There Supports Big Akwa in a Sustainable Revolution

*Collaboration, innovation, and strong investors are key to bringing visions to life. Big Akwa's fourth investment round is attracting both new and returning investors. One of them is Almost There, an exciting partner providing valuable support for Big Akwa's vision of locally produced, fairly priced, and sustainable fish.*

### Almost There: A Strong Commitment to Sustainability and Innovation

Almost There is a company dedicated to supporting businesses with the potential to drive sustainable solutions. By investing in companies like Big Akwa, they help enable innovation and growth within the sustainability sector.

Among Almost There's initiatives, there is a strong focus on the future and sustainability, including a regional marketplace for small-scale food producers, vocational training in tourism and food craftsmanship, the operation of Peetgården – their own restaurant and conference venue, and support for startups focused on green technology.

Almost There is driven by a clear vision to create real, sustainable change through collaboration and innovation. Their goal is to take ideas to the next level by testing them on a larger scale and turning them into reality.

A clear example of this is their investment in Big Akwa, whose innovative work in sustainable fish farming aligns perfectly with Almost There's vision and strengthens their shared journey toward a greener future.

### Tom Løyche, Almost There

*"We see great potential in Big Akwa. Their innovative approach and focus on sustainability align with our vision of supporting the businesses of the future. Our investment is a clear example of our commitment to creating a better and more sustainable world."*

### Elena, CEO Big Akwa

*"The investment from Almost There is invaluable. It allows us to accelerate our development and fully commit to sustainable solutions in fish farming. We are proud to have their trust and support."*
